

Meeting 4 agenda

Sprint review

- Go over everyone's reviews and make goals for the whole group.

Questions

- Should we use get and put requests or sockets?
- How should we test with mockito?
- What exactly do we have to have for next week's demo? For example do we need colors in the gui?
- How do we have to make the sprint review?
- What should we do to get more points?

Activities

- Make tasks we need to do.
- Order them with the Moscow method.
- Split the tasks among the group members.
- Make Sprint plan for the week (and commit it to git).

The end

- Review the meeting
