Meeting 4-Notes

Situation: Everyone was present

Feedback
- Merge to master branch before the meeting (every Sunday evening)
- Release tags every week before meeting
- Push to master branch when you feel like the features are stable
- Put the agenda, reports, into master before the meeting. A screenshot with overview of test coverage and checkstyle
- Git behaviour needs to improve (comment on merge requests, set deadlines for tasks, add issues to scrum board consistently etc)
- Make sure everyone contributes well to the project. Help each other out.
- Make sure test coverage goes up

For next demo:
- Implement vegetarian meal feature
- Click button to register meal, send a request to the server, store it and persists it

To Do:
- Connect database to server and work with querying
- Store data of vegetarian meal and provide data when requested
- Make GUI for registration page
- Add more mockito tests
- Upgrade requests to HTTPS
- Clean up Javadoc
- Figure out user authentication
- Client and database tests
- Hashing function for password (Recommended SHA256 Algorithm)
