Meeting 1: 14-feb (happy valentine's day!)
Maven vs Gradle:
-Maven uses xml
-Gradle uses groovy (way more readable)
-Future cse projects require maven, but we are allowed to use gradle now if we want

Group contract
-Absence:
    -Be clear about when you can/can't come
    -Let know at least 24 hours in advance
-Coming late:
    -Cake rule: bring cake next meeting
-Missed deadlines:
    -Better communication: ask for help
    -Depends on priority on the issue
    -Avoid creating tasks that depend on other people

Next meeting (monday 18):
-Don't touch code yet
-Sophie is responsible for dividing the tasks
-Get to know the tools (git, IDE, maven/gradle ...)
-Take a look at the rubric (on brightspace)
